The following table shows the absolute minimum space measurements.

Rig height	3m 50cm
Minimum ceiling height	4m
Floorspace required	4m x 5m
Type of surface	Flat & clear of obstructions

ENCHANTED GARDEN / WINTER

Ambient Aerial / Aerial Bartending

- Approximate rigging time once in venue – 2 people 30 mins; 1 person 1 hour
- Approximate de-rigging time – 2 people 20 mins; 1 person 40 mins
- For H&S rig must never be moved without the artist present.

PLEASE NOTE:

For venues where the rig will be within reach of an audience, for health and safety reasons, **security measures will be required throughout the event** to ensure that no-one attempts to climb on to the rig. This is a regular occurrence with this structure. Security ropes & posts or a security guard are both a great way of keeping both the performer, and guests safe.

During an event, this is the responsibility of the venue or booker and NOT the artist.

Full Risk Assessment available on request

Size and weight for transportation:

- 1 x Hold Suitcase – 20 kg max
- 1 x Pole bag – 30kg - 160cm x 30cm x 25cm
- 1x Aerial Hoop – 7kg - 1m diameter OR
- 1 x trapeze – no additional luggage
